SkyVision Intuitive Hub
Content Media Management System

skytron

Advanced capture, archive, and communication ability

Efficiently handling visual data is a necessity both during and after a procedure to ensure positive surgical outcomes. Simplify processes and supplement existing surgical workflows with the Skytron Intuitive Hub video capture and streaming system.

Evidence Based Case Review and Conferencing

- Physician and departmental performance metrics to continuously improve quality of care and team coordination
- Clinical workflow tools for snapshots and tagging, advanced video editing, indexing and reporting with automatic sharing with the EMR and VNA

Vendor Neutral

- Integrates video in the OR from source devices
- Archive captured images and video to Electronic Medical Record, PACS, VNA

## Secure Enterprise Storage and Access Anywhere

- Central storage of all media accessible via desktop or mobile device
- Uses Hospital LDAP/ Active directory to control access to applications
- Removes silos of information and workflow by providing on demand and live access to clinical video from anywhere
- Eliminates costly complex projects and localized departmental solutions
