

3008 Clarity

Surgical Table

The 3008 Clarity brings Skytron quality and versatility to an imaging surgical table. With a radiolucent 83" carbon fiber table top and floating top functionality, the 3008 offers precise and infinite control of the top's movement. The Clarity's wide range of motion and radiolucency make it a versatile and adaptive table for a variety of specialties and case types.

Imaging Access

The 3008 Clarity is equipped with an 83" carbon fiber top capable of sliding in any direction. Fully radiolucent, the carbon fiber construction allows clinicians to use the lowest doses for imaging and still maintain excellent image clarity. The 3008 boasts an impressive 65" unobstructed longitudinal imaging window.

Floating Top

The float function is engaged with a single button, allowing the user to reposition the top in any direction with ease even with a 500lb patient load.

Hand Control

A specially designed, comfort grip hand control is all that is needed to articulate the 3008 Clarity floating top. The float function is engaged with a single button, allowing the user to push or pull the top in any direction with ease.
