

SkyVision Ascend

Video Integration

The Platform of the Future for Video Integration

Managing the complex array of visual technologies within the operating room is crucial to delivering patient care and ensuring positive surgical outcomes. The Skytron Ascend video integration system works alongside staff to improve surgical workflow, leveraging technology for high-performance and efficiency with its native 4K capabilities.

Simple End-User Design – For the Present and the Future

- Investment protection with 10 year planned product innovation roadmap
- Designed to support VESA standard definition, high definition, 4K signals, with future 8K compatibility
- Vendor Neutral design provides freedom to choose the video and imaging vendor for each surgical team
- Central control of the OR visual and audio workflows via a single home screen
- Automated workflows interfaced with EMR / PACS / ADT systems to provide streamlined access and care in a secure environment

Built for Care Coordination and Collaboration

- Allows for multi points of communication from OR to remote sites for live communication, consultation and mentoring
- Automates the workflow for visual management of procedural library
- Reduce manual tasks and process for patient care and media management applications

Adaptable Placement with an Intuitive Interface

SkyVision Ascend Provides:

- Staff can quickly and effectively manage the critical— clinical visual media in the OR with two-touch routing with our easy-to-use interface
- Seamlessly connects to:
 - Data and recorded information when paired with our GS70 Salus surgical table
 - Media management, for post operative collaboration
- Flexibility to place the unit in or outside of the operating room with Ascend's small footprint
