

SkyVision Ascend

Video Integration

The SkyVision Ascend is an integration control system designed for the Operating Room. This intuitive system allows staff to easily route images from any compatible device, allowing you to see what you want, where you want it.

Ascend

A Simplified Solution for a Streamlined OR

Simple to Use

- Straightforward design and user-friendly interface
- Increased operational efficiency
- Easy two-touch routing— simply select an image and choose which display you want to see it on

Access Stored Media from Anywhere

- Adaptability to Skytron's integrated capture and streaming system (CAST)
- Capture, record, and tag images and videos during the procedure and have them stored in the media management center to access at a later time from any device

Time Management

- Communicate audibly and visually through SkyVision reducing trips back and forth to the OR
- Save time and increase surgical efficiency
- Two-touch routing simplifies sourcing

Financial Savings

- Ascend's reduced footprint allows for it to be installed at a nurse station, on a boom, or outside the OR
- Reduce any unnecessary clutter in the Operating Room
- Simple installation offers quick install times and increased cost savings

Future Proof

- Vendor-neutral system ensures that it will meet the needs of any facility
- Fiber optic infrastructure allows for the highest image quality without decay or signal loss
- Fully supports standard definition, high definition, and 4K video signal, with future growth supporting 8K

Inputs	Outputs	Supports
12	12	SD, HD, 4K Video, 8K Ready

Skytron provides safe and efficient healthcare solutions delivered through a local representative network that values long-term relationships and comprehensive service.

Focused on providing the highest quality solutions while delivering the lowest cost of ownership, we prioritize transparency and accountability in our actions.
