

CuVerro[®] Antimicrobial Copper

Warming Cabinet Handle Upgrade

Engineered for durability, and strength with bactericidal efficacy, the CuVerro[®] copper surface continuously kills 99.9% of harmful bacteria¹. These antibacterial properties work 24/7 give you a cleaner, and safer work environment.

CuVerro[®] is the only class of solid surface materials registered with the U.S. Environmental Protection Agency (EPA) to actively kill bacteria

Continues to Disinfect in Between Cleanings

Antimicrobial copper works to continuously eliminate infectious bacteria even in-between cleanings.

Reduce Germs Responsible for HAIs

Antimicrobial copper creates a cleaner environment that actively assists in the reduction in the spread of bacteria and viruses, especially high touch areas like cabinet handles.

Better Protection Against Superbugs

Bacteria cannot develop a resistance to copper, making it an ideal choice.

Antimicrobial Copper Handle

Cleaner, Safer, and Built to Last

Keeping Your Workspace Safe and Sanitary

- CuVerro® Copper has a tarnish resistant makeup and will not breakdown or wear away
- Perfect for commonly touched surfaces
- Easy to maintain
- More sanitary than other materials

¹Laboratory testing shows that, when cleaned regularly, CuVerro surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant Staphylococcus aureus (MRSA), Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, E. coli O157:H7, and Vancomycin-Resistant Enterococcus faecalis (VRE). The use of CuVerro bactericidal copper products is a supplement to and not a substitute for standard infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. CuVerro is a registered trade of GBC Metals, LLC and is used with permission.
