

DoVera 2

Surgical Light

Designed for any surgical application, DoVera 2 delivers exceptional illumination with minimal glare. The superior light quality provides shadowless, color-correct light for every surgical site, configurable to surgeon or procedure preference.

Driving Efficiency in Every Operating Suite

The DoVera 2 is Skytron's fixed focus lighting solution for the surgical lighting market, delivering exceptional performance without compromising value. Designed with purpose, DoVera 2 minimizes glare to provide a more comfortable visual experience for surgical teams during even the longest procedures. The system offers a high level of personalization, allowing surgeons to easily adjust key lighting parameters.

Reduced Eye Glare

DoVera's unique Double Reflection technology eliminates glare at the lighthouse and provides uniform light across the surgical field.

Personalized Lighting

Capacitive touch controls at the yoke enable an easy, personalized lighting setup, while eleven selectable spot sizes ensure the right illumination for any procedure. With seven color temperature settings ranging from soft to bright white, users can tailor lighting to their preference or procedure needs. Light intensity, color temperature, and spot size can also be adjusted seamlessly throughout the procedure using either the yoke, sterile handle, or optional wall control.

Built-In Ambient Lighting

Beyond the primary surgical field, the DoVera 2 also excels at illuminating peripheral areas, improving overall visibility within the operating room. Enhanced ambient illumination supports better spatial awareness and efficiency for the entire clinical team. By combining adaptability, visual comfort, and comprehensive coverage, DoVera 2 delivers a reliable lighting solution for modern surgical environments.

Ambient Lighting Enhances Safety without Distraction

Versatile Lighting Configurations

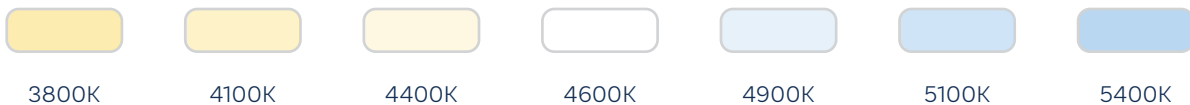

Single Yoke Configuration

Double Yoke Configuration

7 Color Temperatures

Design Your Lighting Setup to Your Needs

- Intuitive yoke-mounted control with the choice of a convenient wall-mounted control system to match user preference and workflow
- Flexible control options help surgical teams operate lighting in alignment with established practices
- Streamlined setup enables quick adjustments throughout all procedure types
- Optional HD camera integrated into the wall control system
- Provides clear, high-definition imaging for documentation, teaching, and live streaming
- Supports facilities focused on education, collaboration, and procedural review
- Sterile handle control allows for easy setup while maintaining sterile field integrity

Your Environment – Illuminated in Precise Detail

Skytron's Lighting Solutions

- Full range of lighting solutions combine crisp, clear illumination with reliability and ease of use
- Surgical LED lighting features unique, vertically segmented reflectors that reduce shadows while producing a clear, homogeneous spot
- Variable and fixed focus options available for surgical lighting
- Recessed LED exam lighting keeps your healthcare space free of ceiling-mounted equipment conflicts
- Market-leader in surgical lighting technology

Skytron innovations build on a 50-year legacy of creating patient and staff-centered environments that prioritize safety and efficiency. We take a consultative approach, actively listening to our customers' challenges and initiatives, enabling us to align our solutions to streamline processes, reduce risk, and deliver maximum value. Our dedicated network of local specialists provide a consistent experience, supporting you from initial design through implementation and ongoing support.
