

Hybrid Suite

Flexible Designs

Getting the most from your OR

Increasingly, clinicians require more versatile environments that can enable them to carry out complex minimally invasive procedures. Skytron has teamed up with different imaging vendors to create hybrid OR solutions that save clinicians critical time and flexibility to perform open or complex minimally invasive procedures in the same room.

Versatile environments that optimize efficiency

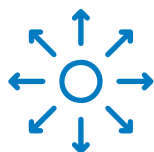

- Easy two-touch routing with Skytron Ascend integration
- Freedom Booms offer unparalleled reach to put equipment where it needs to be

Carry out complex, minimally invasive procedures

- Clinical staff benefit from a more tailored and intuitive environment
- Reduce costs for the care provider and decrease the amount of time the patient spends in the hospital

Future proof solutions

- Equipment
- Plug-and-Play installation makes replacing outdated technology simple

Greater Reach
& Vertical
Flexibility

Minimum 360°
Rotation

Easy to
Move with
Active Assist

The perfect match of technology & experience

Developing a well-planned and flexible 'hybrid' solution for healthcare providers increases utilization of the room. Skytron's experience with interventional imaging companies provides optimal solutions for this complex environment. Clinicians benefit from Skytron's expertise by allowing us to help in the design process to confirm the correct equipment will reach where it is needed.

Technology and experience insures that the right equipment is available for surgical and image-guided specialists including:

- Vascular Surgeons
- Cardiothoracic Surgeons
- Interventional Cardiologists
- Neurosurgeons
- Electrophysiologists

Expert design and support

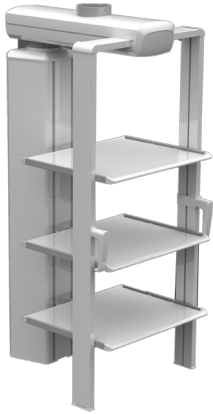

Designing unique, complex Hybrid Rooms takes time and expertise. Skytron offers flexible solutions for designing these types of rooms, whether you are designing for today's needs or future procedures. Mounting multiple arms from a single spindle allows for greater flexibility in positioning your equipment. The Freedom Boom series provides the ability to adapt to future needs by adding or changing your equipment.

Turn any idea into reality with advanced planning tools such as:

- OR concept guide
- Project and planning guide
- Online portal for architects and planners
- PowerTrak 3-D room designer

Freedom Carrier Configurations

Freedom offers many configurations to support your specific equipment and utility needs not only today but with ample space for future expansion.

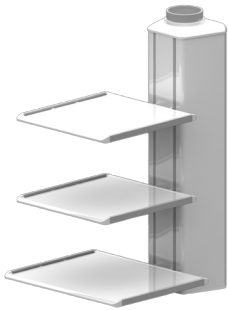

4CMC/4CMW Series with front supports

- Three-point rail design
- Center-aligned shelves
- 110 lb capacity per shelf
- 37" & 49" heights
- 17", 22" or 32" shelf widths

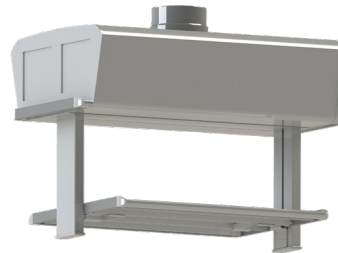

4CMC/4CMW Series

- Open design
- Center-aligned shelves
- 77 lb capacity per shelf
- 37" & 49" heights
- 17", 22" or 32" shelf widths

4VBC/4VBW Series

- Open design
- Cantilevered shelves
- 77 lb capacity per shelf
- 37" & 49" heights
- 17", 22" or 32" shelf widths

4UBW Series

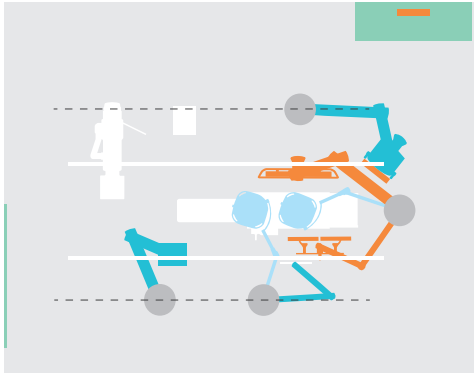

- Horizontal utility box
- Under-mount shelf
- 77 lb shelf capacity
- 8" height
- 22" shelf width

Exclusive Articulating Hub is Perfect for Compact Spaces

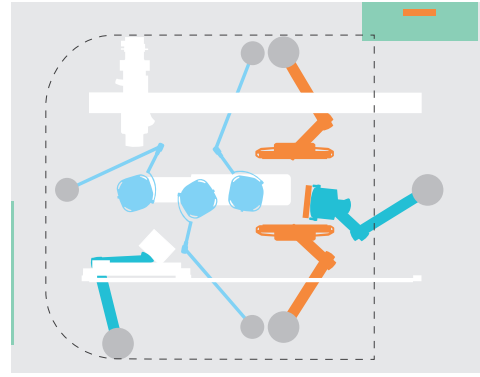

Freedom Booms offer more versatility than the competition. With the ability to offer an articulating hub, more products can be mounted from a single arm which works perfectly in areas with tight spaces or when you need to store items out of the way when they are not in use.

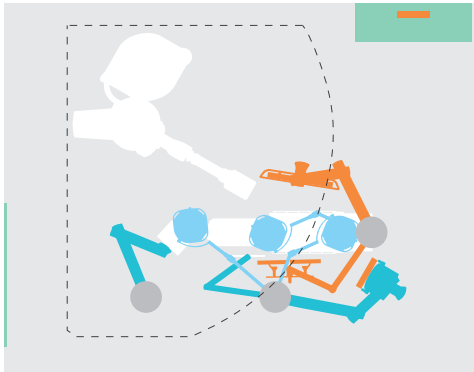

Ceiling-Mounted Imaging System Options

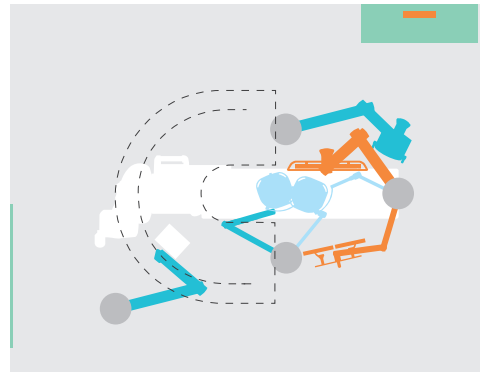

Compatible with Canon Alphenix™

Compatible with Philips FlexMove

Compatible with Siemens ARTIS pheno

Compatible with GE Discovery™ IGS 7

Hygienic Work Environment

- Reduce installation times and bacterial growth by installing EASE Modular Walls into your Hybrid OR

Complete Lighting Control

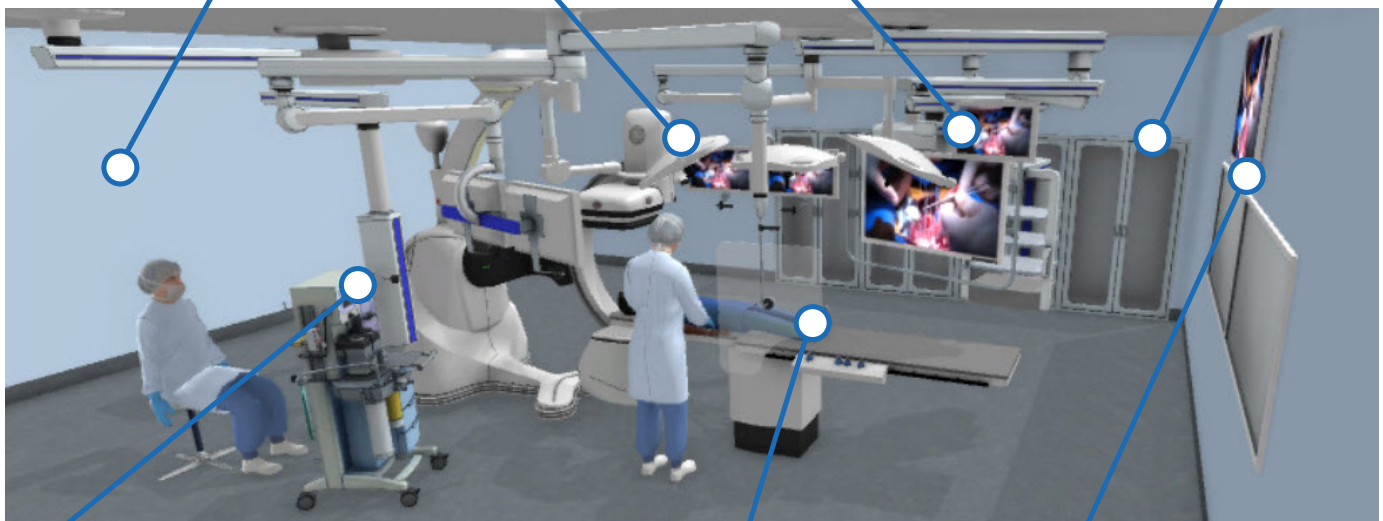

- Control the intensity and focus of your lights within the sterile field with our Aurora Four surgical light

Easily Manage Video Information

- Improve communication and workflow within your Hybrid OR with our SkyVision Ascend
- Efficiently handle video and audio data with Skytron's CAST Media Management System

Save Space and Reduce Clutter

- Attain convenient access to all supplies needed for patient care

More Access, Savings, and Safety

- Reduce trip hazards by keeping hoses, cables and cords safely off the floor
- Convenient access to lights, equipment and flat-screen displays
- Lower construction costs with our single mount design

Easy Manipulation

- Our light boom arms make adjusting radiation shields and other equipment smooth and effortless
- Increase coverage and position equipment from a single mount

Clear and Precise Procedures

- Perform with precision using high resolution displays that offer quick video response times

Versatile environments? Skytron has it covered.

No matter the clinical need, Skytron will work alongside planning teams to aid in the design of a basic room or the most complex. Skytron has more options and combinations for any budget or specialty.

Find a solution for every environment or specialty

- General Operating Room
- **Hybrid Operating Room**
- C-Section Suite
- Interventional Lab
- Intensive Care Unit
- Emergency Department
