

Instrument & Storage Stainless Cabinets

Our IS Cabinets deliver a smarter approach to healthcare storage with modern aesthetics and flexible configurations designed to support evolving clinical environments. Built from high-quality stainless steel and engineered for durability, these cabinets provide a streamlined storage solution for operating rooms, sterile processing departments, procedure suites, and beyond.

Storage Solutions Built for Today's Healthcare Environments

Skytron IS Cabinets combine clean, contemporary design with practical functionality to meet the daily demands of healthcare teams. Available in recessed and freestanding models, the portfolio supports a wide range of storage requirements with configurable options including:

- Pegboard backing configurations
- Bin rail organization
- Adjustable shelving
- Electronic lock options
- Hanging slide racks

With multiple widths, depths, and heights available, facilities can configure storage solutions that maximize space while supporting clinical efficiency and accessibility.

Designed Around Real Clinical Workflows

Skytron developed the IS Cabinet line with direct feedback from healthcare providers and clinical staff to ensure the product addresses real-world operational challenges. Features like configurable storage and intuitive organization tools help clinicians access supplies quickly and efficiently.

Whether storing sterile supplies, procedure accessories, or clinical equipment, the IS Cabinets help create organized environments that improve staff productivity and workflow consistency.
