

SkyVision LINX 300

Video Integration

Improve. Communicate. Perform.

Managing the complex array of technologies within the operating room is crucial to delivering patient care and ensuring positive surgical outcomes. The SkyVision LINX 300 integration system works alongside staff to improve surgical workflow, leveraging technology for high-performance and efficiency.

User Centered Design – Now and in the Future

- The LINX 300 user interface is simple and intuitive
- Features two-touch routing and a built in preview window
- Easily expandable for future needs and longevity
- Configurable system software meets the clinical requirements of the OR

Built around care coordination and collaboration

- Allows contact between the OR and remote sites for live multi-directional communication and support
- Consult with colleagues in multiple locations simultaneously
- Stream real-time HD video, text and graphics for clinical assistance or education

Patient and Staff Safety Safeguards

- Improved communication reduces the time that patients are under anesthesia
- Built in power supply ensures uptime and prevents a “lights out” event of the integration system in OR

Flexibility and function

Functions Available with LINX 300

- Route connected sources to any display
- Capture, store and archive HD video and still images
- Stream video outside the OR to multiple locations simultaneously
- Create, save and update surgical team and case presets
- Route surgical safety checklists
- Manage multiple PCs via a single keyboard and mouse
- Connect room audio and wireless microphones
- Make hands-free phone calls

Differentiating Features

- Integrated content media management system organizes and stores visual clinical data, facilitating workflow and documentation
- On-board uninterrupted power supply provides back-up until emergency generators are on line
- Compact rack allows for placement within the OR or at a remote location – freeing up valuable floor space
- Fully fiber optic cabling carries more information over greater distances without compromising quality, and accommodates current and future technologies
- Medical-grade touchscreen is completely sealed to fluids and easy to clean, reducing risk of contamination
