Lumos

Surgical Light

Lumos brings the next generation of LED lighting to the Skytron portfolio. Built on our best-in-class reflective LED technology, it delivers sharp clarity, precise focus, and superior shadow control, right where clinicians need it most.

skytron®

Lumos can be Tailored to Individual Preference.

Light is subjective, what works for one clinician may not work for the next. That's why Lumos was designed to adapt to individual preferences. With 60 distinct light variations, including 12 settings that produce the highest allowable brightness, Lumos puts precise control in your hands. Adjust intensity, tailor focus, and fine-tune illumination to match the demands of any procedure. The result is personalized lighting that enhances your ability to see what matters most.

Personalization

Lumos delivers crisp, deep-cavity illumination for any procedure, with three spot sizes to match the task at hand. Sixty combinations of spot size, color temperature, and intensity give surgeons precise control over every field. With ten customizable presets, Lumos streamlines setup, cutting time and frustration so the team can focus on the procedure.

Focusable Light

A single twist of the sterile handle adjusts the focal point to the surgical team's preference, eliminating the need to reposition the lighthead, so it stays clear of the surgical field.

Intuitive Control

Lumos' wall control offers a sleek flush mounted design with a simple LCD touch screen that places lighting control at your fingertips. With a simple touch on the LCD screen, cycle through three spot sizes, four color temperatures (3800K–5000K), five intensity levels, and control of the in-light surgical camera.

Concentrate on the Case, Not the Equipment

- Fine-tune the focal point with a simple turn of the sterile handle
- Extend the working distance without repositioning the lighthead
- Maintain valuable surgeon headroom while adjusting focus
- Achieve precise visualization at greater working distances
- Make quick focus adjustments without interrupting the procedure
- Smooth, effortless positioning with full infinite rotation on every axis
- Designed to simplify workflow while delivering exceptional illumination

Your Environment — Illuminated in Precise Detail

Skytron's Lighting Solutions

- Full range of lighting solutions combine crisp, clear illumination with reliability and ease of use
- Surgical LED lighting features unique reflective technology that reduce shadows while producing a clear, homogeneous spot
- Variable and fixed focus options available for surgical lighting
- Recessed LED exam lighting keeps your healthcare space free of ceiling-mounted equipment conflicts
- Market-leader in surgical lighting technology

Skytron innovations build on a 50-year legacy of creating patient and staff-centered environments that prioritize safety and efficiency. We take a consultative approach, actively listening to our customers' challenges and initiatives, enabling us to align our solutions to streamline processes, reduce risk, and deliver maximum value. Our dedicated network of local specialists provides a consistent experience, supporting you from initial design through implementation and ongoing support.
