

# SVIS-CAST

## CONTENT MEDIA MANAGEMENT SYSTEM

Powered by ORPHEUSMEDICAL

### Comprehensive management of visual surgical data.

The Skytron SVIS-CAST media management system provides documentation and visibility of the data and images used during a surgical procedure – supplementing surgical workflow and ensuring positive patient outcomes.

# SVIS-CAST

## CONTENT MEDIA MANAGEMENT SYSTEM

Powered by **ORPHEUSMEDICAL**

### CAPTURE

- ▶ Record video and audio from any source, anytime, anywhere
- ▶ Store content in a centralized location with on-demand access via secure client application

### DOCUMENT

- ▶ Accurately document medical diagnosis and treatment
- ▶ Detail patient records with images, videos and annotations

### SHARE

- ▶ Create video clips, diagrams and reports to help tell the staff's story
- ▶ Configure and edit information to share in presentations for collaboration and peer-review

### IMPROVE

- ▶ Enhance surgical quality and patient outcomes through review and analysis
- ▶ Build a library of cases to support quality and training systems

### SAVE

- ▶ Focus more time on patients by automating processes and reporting
- ▶ Remove cost by leveraging existing network and devices

The literature has been developed to provide healthcare professionals with general product information. Please note: not all products are available in all countries. Product labeling and associated claims may differ based on regulatory requirements. For product availability or any further information, please contact your local Skytron representative.
