- 33 5" Side Extension
Arm Support

Designed to handle extended amounts of wear and use, our cast aluminum armboard will continue to perform for years to come. The easy to find and use release handle will eliminate the need to bend and crouch. If you need the additional security of a locking handle, the Premium Locking Armboard adds a large rotating knob that will tightly lock the armboard to the side rail. This added security step will prevent any movement even at extreme table articulations.
Speciality Arm Support - Armboards

Save time by reducing the amount of armboard exchanging between cases with the versatile Multi-Task Armboard. This adaptable armboard is adaptable to work with a variety of patient body types and positions from “prone” to “beach chair.”

Arm Support - Armboards

Accomplish complete imaging from the tip of the fingers to the heart without any interference using one of Skytron’s Carbon Fiber Armboards. Strong and lightweight, they are easy to install and position making them a perfect addition to your table accessories. This is designed for use with our 3000 series tables or our 40” carbon fiber extension.

Pivoting Carbon Fiber Armboard
P/N 2-060-04

Carbon Fiber Armboard

Arm Support - Arm and Hand Surgery Boards

Flexibility and efficiency are essential in the OR. Keep a level work surface by offsetting the patient’s arm weight with Skytron’s Carter Hand Surgery table. Gain 360° imageability with our Carbon Fiber Arm Surgery Board. It attaches to Skytron’s 3000 series tables and our 40” Carbon fiber extension.

### Additional Notes

- X** Requires 6" Clamp-on Rail (6-070-07)
- X† Requires Head End Uro Tray Bracket, not compatible with 3603
- X†† Requires Pediatric Table Extension (4-030-42)
Simplified Shoulder Surgery Positioning
With the Skytron Beach Chair
Reduce setup times with Skytron Beach Chairs. They are lightweight, easy to install, and increase patient safety. Adjustments to the chair are as simple as pressing a button on your pendant control. This accessory supports up to 600 lb. patients and is compatible with Skytron 3600 and 6700 series tables.
Body Support - Side Extensions

Create less hassle and stress on the surgeon and staff during a case with our side extensions. Greater access for the surgeon is important, especially for bariatric cases and our wider table top capabilities can achieve those needs. Installation and removal are quick and easy with our spring loaded clamp.

5" Side Extensions
Access your patients with ease with the 20" wide Skytron tabletop. This allows surgeons and staff great access without leaning over the patient, reducing fatigue and risk of injury. Larger patients may require a wider table surface. To solve this problem, Skytron offers the 5" table side extension creating a 30" wide tabletop for bariatric patients. The 5" side extension will not slide or lift from the side rail and is compatible with standard clamps, armboards, and stirrups.

Body Support

Expand accessibility to your patients during a procedure with the Lower Back Section. Ideal for anesthesiologists, this section gives better access to your patients in tough positions like lower body imaging or lithotomy. Distances can be shortened between the surgeon or staff and the patient with the Lower Back section. Designed for the Skytron 3600 and 6700 series tables.

Great for Anesthesia

Leg Support

We have the solutions to meet your needs. Skytron provides a variety of choices for patient leg support and positioning. Achieve great surgical access that is otherwise difficult with a standard leg section with our Split leg accessories.

Heavy Duty Split Leg
P/N 4-030-61

Keep your staff and patients safe at low position levels with the Heavy Duty Split Leg accessory. Ideal for bariatric support, this accessory can support up to a 600 lb. patient on the 3600 series table and helps keep the patient in place without relying entirely on nerve-damaging straps with integrated pelvic tilt seat. It can also provide better patient access for the surgeon.

Universal Split Leg

Foot Rest
P/N 4-030-04

Foot Rest
P/N 4-030-01

General Tilt Seat
P/N 3-040-12
Leg Support - Ortho Trax

Achieve flexible positioning and imaging accessibility for orthopedic surgery. Our systems are uniquely designed for lower extremity and hip procedures and can be attached to any Skytron general purpose top slide surgical table. This system is ideal for imaging equipment and can easily be adjusted according to patient size and positioning requirements with our carbon fiber leg spars.

Leg Support - Transfer Boards

Reduce fatigue and produce higher turnaround with our lightweight and easy to install Hyper Light Leg Section. Removing and attaching sections is easier on staff and creates less strain on the body weighing less than six pounds. Alternatively Skytron also offers a variety of transfer boards which are lightweight and reduce the strain of lithotomy positioning.

Clamps

Whether you need to clamp rounded or flat bar accessories, add a side rail to your various extensions, or upgrade from your old "Clark Socket" style clamps, Skytron has the options to meet your needs.

- **Schure Socket**  
  P/N 6-040-11

- **Spring Loc Clamp**  
  P/N 4-090-15

- **Tri-Clamp**  
  P/N 6-040-03

- **Universal Side-Rail Clamp II**  
  P/N 6-040-12

- **EZ Grip Bar Clamp**  
  P/N 6-030-05-1

- **6" Clamp-On Rail**  
  P/N 6-070-07

- **Clamp-On Rail for Pediatric Extension**  
  P/N 4-030-42-9

- **12" Clamp-On Rail**  
  P/N 6-070-07-3

- **Bar Clamp - Standard**  
  P/N 6-030-01

- **Standard Bar Clamp**  
  P/N 6-040-10

Easy to install and less risk of clamps moving out of place, the Skytron Schure Socket XL and Spring lock clamps are a great addition to your table accessories. These clamps have the flexibility to be installed anywhere on the table side rail effortlessly.
Extensions

Surgical and imaging access is the key to success in the Operating Room. Achieve the best patient positioning and access with our Skytron extensions. OR Staff can get better access to smaller patients with the Pediatric extension, and like the 40” extension it provides a 360° range of imaging flexibility.

90” Restraint Strap
P/N 6-010-41-VE
Table Pads

Keep pressure management in check with a high-quality three-layer table pad. Provide comfort to your patients with the soft cradling Viscous memory foam. Skytron Table Pads are easy to clean with leak-proof seams. Sizes available from two to five inches thick.

Reduce costs spent on table pad replacements with the Welded Seam Pad. Liquids will stop from entering the inner foam layers with the adhesive and heat formula, this creates "weld" that closed the seams.

Each Welded Seam Pad has a vent located on the side of the pad. This vent allows air to enter or leave the pad while preventing fluid ingress so that foam can expand and contract.

Welded Pad with "welded" seams

See the Table Accessories Matrix to find Part Numbers and determine which pad set is needed for individual Skytron tables.

3” Welded Seam Pad shown.

Top Cover: Fusion Synergy Conductive Urethane Coating
1” (25.4mm) Viscoelastic
1-1/2” (38.1mm) Foam
1/2” (25.4mm) Closed Cell Foam

Bottom Cover: Fusion Synergy Conductive Urethane Coating

The exterior of Welded Seam Pads are treated with Triclosan, an antimicrobial agent.
General Accessories

Optimize greater positioning and functionality in your Operating Room. Our vast selection of accessories and positioning devices can fit your specific needs. Your OR will be equipped to handle any procedure when the right accessories are combined with your Skytron table.

Guardian Series Accessories

G-Series table accessories are our newest table attachments and are compatible with Skytron’s brand new line of Guardian table models. Compliment your Operating Room with unmatched imaging length and surgical access with the 44” carbon fiber extension. G-Series accessories provide greater safety when the accessory attaches in place of the table’s leg section and will communicate with the table to eliminate collisions.

44” Carbon Fiber Extension
P/N 4-031-01
The 44” extension provides unmatched imaging and surgical access all while maintaining an 800 lb. patient capacity.

Light Weight Leg Section
P/N 4-031-02
The lightweight leg section provides an alternative to the standard leg section which is lighter and easier to take on and off. This accessory is most useful for constant lithotomy positioning when the leg section is regularly removed and reinstalled.

Kidney Ureter Bladder - KUB
P/N 4-041-01
The Kidney Ureter Bladder board provides additional imaging length and width while the carbon fiber allows for 360° of imaging making oblique c-arm imaging easy.
Pediatric Extension
PN 4-031-03
Eliminate offsetting patients or poor posture by leaning over the table. The pediatric extensions provide direct access to smaller patients. At 15” wide this extension provides great access from either side for your smallest patients.

5” Side Extension
P/N 3-060-09
The 5” table side extensions will not slide or lift from the table side rails and lock firmly in place. They will provide a 30” working surface to meet bariatric needs.

Leg Split
P/N 4-030-70
Take the work out adjusting leg extensions. Powered by the table itself the split leg integrates perfectly with G-Series tables. The split leg works independently or in unison by raising or lowering each leg using the power of the table.
Skytron is the Healthcare Efficiency Specialist, providing full-room solutions of capital equipment, architectural and real-time information systems for Medical, Surgical, Sterile Processing, and Infection Prevention. Our solutions enhance the utilization of people, facilities, and capital because they are designed with the user in mind and have a low, long-term cost of ownership.
