

# VueSync

## PeriOperative Monitoring Interface

VueSync gives you complete visibility into every operating room with real-time IP camera feeds. Designed for efficiency and peace of mind, it lets you monitor activity, tailor layouts to your workflow, and safeguard privacy with built-in face blurring.

## Real-Time OR Visibility for Smarter Workflow

Gain instant insight into your operating rooms with live IP camera feeds displayed on a centralized dashboard. At a glance, see whether a room is in surgery, being cleaned, or ready for the next case—all without stepping inside. Switch between video layouts for quick situational awareness and complete control.

Track room occupancy and turnover in real time to reduce downtime and accelerate case readiness. With live visual data, staff can plan ahead, make faster decisions, and maximize OR utilization throughout the day.

## Faster, Intelligent Workflow

- Track occupancy status to reduce turnover time
- Optimize cleaning and prep workflows
- Plan ahead with live visual data for smarter scheduling
- Maximize OR utilization throughout the day across all procedures

## Built-In Privacy Protection

- Automatic face blurring on all camera feeds
- One-click toggle between blurred and clear views
- Designed to meet strict surgical privacy requirements

## Intuitive Layouts & Focus

- Choose from multiple video layouts (equal feeds or spotlight view)
- Click any feed to enlarge or go full-screen instantly
- Adapt views quickly for faster decisions and better room management
